ERP (odoo)

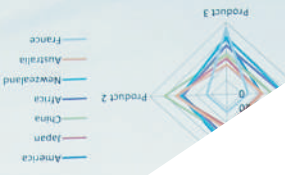

Integration

Odoo is a fast growing popular ERP system that offers a range of business applications that form a complete suite of enterprise management applications targeting companies of all sizes. Odoo is an all-in-one business software including CRM, Website/e-Commerce, billing, accounting, manufacturing, warehouse- and project management, and inventory.

Odoo offers two separate versions of the solution; Odoo Community and Odoo Enterprise versions. The Community version is the open source version while the Enterprise version supplements the Community edition with commercial features and services.

We work in tandem with Zestylabs.ae - An Alrais Labs Enterprise Solution Division, to offer integration services with ERP systems. We integrate magento with Odoo in no time with Odoo10 Plugin for Magento2.x. The recent implementation was done for luxury swimwear online shopping Sand Dollars Dubai (www.sanddollar.dubai.com/)

Beacon Integration

Beacons are now trending in ecommerce and retail industry. In this era of consumerism, store owners must use relevant technology to attract prospective customers. The key focus now is on Customer Experience. With the advent of technology driven consumers, it is impossible to attract them with conventional promotional campaigns. Exploring technology driven solution such as Beacon is important to figure out interested or loyal customers and locate them when they are in store premises and engage them with high store experience by sending personalized offers and promotions on their smartphones. This will impart a better shopping experience and data collected from this would be useful for analytics and deriving trends and key performance indicators.

Industry which leverage beacon solution includes retail, objects or vehicles in transit, education institution, event organizing, travel etc.

Use case can be - a beacon fixed in the fence or on a shop premises or event location or any public place, can communicate easily with a respective smartphone app and figure out a prospective consumer in near proximity, with high degree of accuracy. The intelligent system associated with beacon solution can come up with personalized messages to attract the customer to the event or the retail store.
